LAB EXPERIMENT-9

9. Perform Rotation of an image to clockwise and counter clockwise direction.

CODE:

```
import cv2

# Read the image
img = cv2.imread("flower.png")

# Rotate clockwise
clockwise = cv2.rotate(img, cv2.ROTATE_90_CLOCKWISE)

# Rotate counter-clockwise
counter = cv2.rotate(img, cv2.ROTATE_90_COUNTERCLOCKWISE)

# Show images
cv2.imshow("Original Image", img)
cv2.imshow("Clockwise Rotation", clockwise)
cv2.imshow("Counter Clockwise Rotation", counter)

cv2.waitKey(0)
cv2.destroyAllWindows()
```

OUTPUT:
